My signature below means I understand that as a student in the Equipment Operations and Repair class, it is necessary for my safety and the safety of my classmates for me to agree to follow the safety pledge written below and I agree to do so. Also, I understand the consequences, if at a later time, I choose not to.

STUDENT SAFETY PLEDGE

After receiving instructions in use, care, maintenance, storage, safe operation or working in the proximity of the tools and equipment that are a part of this program. I will work safely with others by following all safety rules, asking questions when I don't understand, not attempting to use tools, materials or equipment I'm not familiar with and will try to use good judgement in class and at the worksite.

If, in the opinion of instructors, you display improper or unsafe behavior, you may receive a verbal or written warning. If the behavior is not modified or in the case of a serious unsafe action, you many be removed from activities until a meeting can take place with you, EOR instructors, the NCOC Principal and your Parent(s)/Guardian(s) to determine your future participation in the class.
